

ALARMING NEWS

WINTER 2023

A PUBLICATION FOR ALL OUR VALUED CUSTOMERS

The Perfect Defense Against Winter Hazards

Be prepared for hazardous conditions brought on during colder months.

This time of year generally means spending more time indoors, making now the perfect time to update your home's safety, security, and automation. We have many options to easily integrate disaster sensors such

as smoke alarms, carbon monoxide detectors, temperature sensors, and flood detectors into your system.

You'll enjoy the peace of mind that comes with these life-safety devices and professional monitoring. If there's a fire or carbon monoxide leak, you'll be immediately notified at the panel and through the app. The monitoring center will confirm the alarm event and notify emergency response, if necessary.

As a reminder of their many benefits, smart home security and automation have the answers to these common questions:

Is that draft coming from an open window or door?

Using the notifications function, the app can send an immediate alert to your smartphone.

Is your heating bill out of control?

Save money with a programmable Smart Thermostat. You can control it remotely and get notifications if someone has changed the temperature among other great features.

Does one part of your house always seem colder?

Use a remote temperature sensor with the Smart Thermostat to manage targeted or average temperatures throughout the house.

Can't remember if you unplugged your roof's heat tape?

Simply plug the heat tape into one of our Z-wave outlets and you can turn it on or off from anywhere with the app.

Call us today for more information about these money- and life-saving solutions or to schedule installation. They'll make your winter hibernation more restful.

PRESIDENT'S MESSAGE

Our Family Continues to Grow Thanks to Wyoming Acquisition

We are excited to announce the addition of ComTronix in Casper, Wyoming. The team at ComTronix has been serving the needs of their customers across Wyoming since 1989.

ComTronix was owned by my good friends, Bruce Kopperud and Rob Dobler. I am honored that when it came time for them to retire, they called me. They have built an exceptional business over the last 33 years.

Casper will be our third location in Wyoming. Other offices in the state include Jackson Hole and Cody. The addition of ComTronix to our family helps us achieve our vision of being the best life-safety company in North America.

Scotty Lehner will continue as the General Manager of ComTronix. His team of 17 highly trained life-safety professionals will all continue to serve ComTronix customers. Their ability to do everything from a small security system to a large, complex fire-alarm system speaks to their expertise. They are dedicated to meeting the needs of a variety of commercial and residential customers.

Welcome to the Mountain Alarm family! We are glad to have you.

Sincerely,
Eric Garner, CEO & President

Fire-protection Teams Earn Award

NOTIFIER
by Honeywell

Mountain Alarm and CopperState once again received the Notifier® Million Dollar Platinum Premier Distributor Award for 2022. Notifier is the largest manufacturer of fire-alarm systems worldwide. This award signifies the scale of our business, providing the finest fire-protection products and technology available.

As a certified Notifier distributor, we offer a full line fire-protection products and services including fire alarms, fire sprinklers, mass notification systems, design, installation, monitoring, test and inspections, and maintenance.

We proudly align with Notifier, securing our position at the forefront of technology. This partnership provides building owners and managers the peace of mind that comes with the latest advancements in fire protection and life safety.

Many are Discovering Benefits of Interactive Services After Mandated Upgrades

The telecommunications industry has now completely eliminated 3G service. Over the last two years, this change has mandated that many customers upgrade their alarm systems.

These upgrades afforded customers whose systems operated on outdated technology the opportunity to discover the enhanced security and convenience of our interactive services.

Smart security and home automation offer the most sought-after features of cellular-based systems, allowing you to control thermostats, lighting, locks, garage doors, appliances, and much from your smartphone, tablet, or computer. In addition to the ease of managing your home, many of these features provide cost savings due to improved energy efficiency.

Cellular-based systems provide an enhanced level of security that comes with increased signal reliability. Wireless systems are also easily expanded to add additional components such as a doorbell camera.

If you haven't yet, take advantage of the current advancements in security and automation. A modern platform allows you to make the most of your security system with the latest smart devices, not to mention future advancements.

Enjoy the convenience and features of today's technology. Contact us to learn more about upgrades and equipment options, or to discuss adding interactive services to your alarm system.

Rely on Smarter Security to Best Protect Your Business

Our commercial security systems provide the best protection for your operations, employees, customers, inventory, and property. All of which means better protection of your bottom line.

AUTOMATED PROTECTION

Use the auto-arming feature to turn on intrusion detection at the close of business without fail. You can also have your system arm itself automatically after a period inactivity, or use the app to arm and disarm your system from anywhere.

SUPERIOR TECHNOLOGY

Phone lines and broadband cable are vulnerable. Using a dedicated cellular connection, our systems reliably communicate with the monitoring center. Other safeguards include panel battery back-ups and smash-and-crash protection.

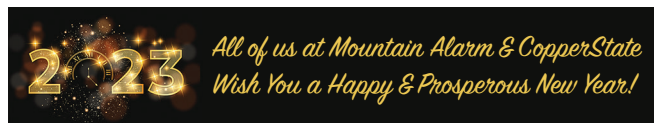

SMARTER ACCESS CONTROL

Replace traditional keys with the latest access control technology. We provide a secure system of smart locks, card readers, and user codes. All of which are controlled from the easy-to-use management platform.

INVALUABLE INSIGHT

Open a live feed of your security cameras from anywhere. And set up video alerts to send you real-time clips when activity is captured.

We make it convenient and easy to meet any business security challenge. Contact us today to learn more about all the state-of-the-art solutions we provide.

If you're mailing a payment, please send it to: P.O. Box 12487, Ogden, UT 84412-2487.
Call 1-888-349-3455 for customer service and remember to test your system monthly.
