Mountain Alarm  
1235 Huron St.  
Denver, CO 80223  
Attention: CJ Simonds, SET

To Whom It May Concern;

Mountain Alarm and the JD Davis CO. has been our Fire Alarm service provider for over 20 years. During this time period Mountain Alarm has performed its contractual obligations to our company with the utmost professionalism. They show a high level of customer service and have always performed the necessary steps to complete any job or task very effectively.

In 2010, Mountain Alarm replaced our 24 year old Honeywell Fire Control System with a completely new addressable Notifier fire control system. Their expertise in the removal and installation of the new system was completed seamlessly without any interruption to our facility or tenants. They delivered the new system on time and within their original budget proposal without any change orders.

I highly recommend Mountain Alarm for any type of fire control service or installation; my organization will continue to utilize their service for many years to come.
